Filed : February 1, 2002

AMENDMENTS TO THE CLAIMS

1. (Cancelled)
2. (Currently Amended) The computer of Claim 51, wherein the first keyboard is positioned on an upper surface of the housing and wherein the opening in the housing is positioned on a side surface of the housing so that the second keyboard extends outward from the side surface.
3. (Currently Amended) The computer of Claim 51, wherein the first keyboard comprises a QWERTY keyboard.
4. (Original) The computer of Claim 3, wherein the second keyboard comprises a movement keyboard
5. (Currently Amended) A portable computer comprising:
a housing having an opening formed in a first surface of the housing;
a display attached to the housing;
a first keyboard positioned on a second surface of the housing;
a second keyboard movably mounted to the housing so that the second keyboard can be moved between a storage configuration and a deployed configuration, wherein the second keyboard in the stored configuration is recessed within the opening of the housing and wherein the second keyboard in the deployed configuration extends out of the opening so as to extend outward from the first surface of the housing; and
~~A portable computer comprising:~~
~~a housing having an opening formed in a first surface of the housing;~~
~~a display attached to the housing;~~
~~a first keyboard positioned on a second surface of the housing;~~
~~a second keyboard movably mounted to the housing so that the second keyboard can be moved between a storage configuration and a deployed configuration, wherein the second keyboard in the stored configuration is recessed within the opening of the housing and wherein the second keyboard in the deployed configuration extends out of the opening so as to extend outward from the first surface of the housing.~~
~~The computer of Claim 1, wherein the second keyboard includes a second keyboard housing having an opening in a first surface in the second keyboard housing.~~

6. (Original) The computer of Claim 5, further comprising a third keyboard that is movably mounted to the second keyboard housing so as to be movable between a storage configuration and a deployed configuration wherein the third keyboard in the storage configuration is stored within the second keyboard housing and wherein the third keyboard in the deployed configuration extends out from the first surface of the second keyboard housing.

7. (Original) The computer of Claim 6, wherein the second and third keyboards are respectively mounted so that when the second and the third keyboards are respectively in the storage configuration, an outer surface of the third keyboard and the outer surface of the second keyboard are co-planar with the first surface of the housing.

8. (Currently Amended) A portable computer comprising:
a housing having an opening formed in a first surface of the housing;
a display attached to the housing;
a first keyboard positioned on a second surface of the housing;
a second keyboard movably mounted to the housing so that the second keyboard can be moved between a storage configuration and a deployed configuration, wherein the second keyboard in the stored configuration is recessed within the opening of the housing and wherein the second keyboard in the deployed configuration extends out of the opening so as to extend outward from the first surface of the housing; and

~~The computer of Claim 1 further comprising a latch mechanism which secures the second keyboard in place when the second keyboard is in the stored configuration inside the housing.~~

9. (Original) The computer of Claim 8, wherein the latch mechanism comprises a hook member positioned inside a cavity region formed on a first inner surface of the housing.

10. (Original) The computer of Claim 6, wherein the second keyboard comprises cursor keys.

11. (Original) The computer of Claim 6, wherein the third key board comprises numeric keys arranged in a 10-key configuration.

12. (Currently Amended) The computer of Claim ~~8~~¹, wherein a plurality of drop-down leg members are formed on a bottom surface of the second keyboard so as to support the second keyboard when it is in a deployed configuration.

13. (Currently Amended) The computer of Claim ~~8~~¹, wherein the first keyboard is operable when the second keyboard is in a stored configuration inside the housing.

Appl. No. : 10/066,286
Filed : February 1, 2002

14. (Currently Amended) A computer keyboard assembly comprising:
at least one keyboard member that is expandable wherein at least one keyboard section is housed in a nested fashion within the at least one keyboard member and is secured within the at least one keyboard member by a latch member such that the at least one keyboard section telescopes out when the [[a]] latch member is released.

15. (Original) The computer keyboard assembly of Claim 14 further comprises a plurality of drop-down leg members formed on a bottom surface of the at least one keyboard section to support the at least one keyboard section when it is telescoped out from the at least one keyboard member.

16. (Original) The computer keyboard assembly of Claim 14 wherein a first keyboard section remains operable when at least one other keyboard section is stored inside at least one keyboard housing.

17. (Original) The computer keyboard assembly of Claim 14 wherein the at least one keyboard member comprises a QWERTY keyboard.

18. (Original) The computer keyboard assembly of Claim 14 wherein the at least one keyboard section comprises cursor keys.

19. (Original) The computer keyboard assembly of Claim 14 wherein the at least one keyboard section comprises numeric keys arranged in a 10-key configuration.

20. (Cancelled)

21. (Currently Amended) A computer keyboard comprising :
a keyboard housing having an opening formed in a first surface of the housing;
a first keyboard positioned on a second surface of the keyboard housing; and
~~The keyboard in Claim 20 further comprising a second keyboard section and a third~~
keyboard section wherein the second keyboard section and the third keyboard section can be retracted back into the opening of the keyboard housing so as to reduce the keyboard's overall lateral dimension without increasing its thickness~~be concealed from view.~~

22. (Currently Amended) The keyboard in Claim ~~21~~20, wherein the first keyboard comprises a QWERTY keyboard.

23. (Currently Amended) A computer keyboard comprising :
a keyboard housing having an opening formed in a first surface of the housing;
a first keyboard positioned on a second surface of the keyboard housing;

Appl. No. : 10/066,286
Filed : February 1, 2002

at least one keyboard section wherein the at least one keyboard section can be moved back into the opening of the keyboard housing so as to reduce the keyboard's overall lateral dimension without increasing its thickness; and

~~The keyboard in Claim 20, wherein a plurality of at least one latch mechanism mechanisms which secures the at least one second keyboard section and the third keyboard section inside the keyboard housing.~~

24. (Currently Amended) The keyboard in Claim ~~23~~ 20, wherein the first keyboard can operate the computer while the at least one second and third keyboard section is ~~sections are~~ stored within the housing.

25. (Cancelled)

26. (Currently Amended) A method of operating a computer comprising:
operating a first keyboard formed on a first surface of a first housing;
deploying a second housing from an opening formed on a second surface of the first
housing;

operating a second keyboard formed on a first surface of the second housing; and

~~The method of Claim 25 further comprises deploying a third housing from an opening~~
formed from ~~on~~ a second surface of the second housing and operating a third keyboard formed on
a first surface of the third housing.

27. (Currently Amended) The method of Claim ~~26~~ 25 wherein the first keyboard comprises a QWERTY keyboard.

28. (Currently Amended) The method of Claim ~~26~~ 25 wherein the second keyboard comprises a movement keyboard.

29. (Currently Amended) The method of Claim ~~26~~ 25 wherein the third keyboard comprises numeric keys arranged in a 10-key configuration.

30. (Currently Amended) A method of operating a computer comprising:
operating a first keyboard formed on a first surface of a first housing;

~~The method of Claim 25 further comprises disengaging a latch mechanism to enable~~
deployment of a ~~deploy the second housing keyboard from an~~ the opening formed on a ~~the~~
second surface of the first housing[[.]];

deploying the second housing from the opening formed on the second surface of the first
housing; and

Appl. No. : 10/066,286
Filed : February 1, 2002

operating a second keyboard formed on a first surface of the second housing.

31. (Currently Amended) The method of Claim 26 ~~25~~ further comprises storing the second housing inside the first housing in a manner such that the second keyboard is inside the first housing and concealed from view.
